

# ■ PhaseGuard Forensic Evidence Dossier

Prepared for: National Cyber Crime Portal (cybercrime.gov.in) | Helpline: 1930

**FINAL VERDICT: CRITICAL**

| Field            | Value                   |
|------------------|-------------------------|
| Call ID          | test-call-123           |
| Call Start       | 2026-09-17T10:00:00Z    |
| Duration         | 1.0 seconds             |
| Ingestion Source | BROWSER_MIC             |
| Generated At     | 2026-09-17 11:23:12 UTC |

## 1. Chain of Custody / Audio Integrity

The SHA-256 hash below was computed over the raw PCM16LE audio bytes at the time of recording. Any modification to the audio file will change this hash, making tampering detectable.

| Field          | Value                 |
|----------------|-----------------------|
| SHA-256 Hash   | N/A                   |
| Audio Size     | 0 bytes               |
| Audio Duration | 1.0 seconds           |
| Sample Rate    | 16000 Hz PCM16LE Mono |

## 2. DSP / Voice Analysis

| Metric                | Result                                      |
|-----------------------|---------------------------------------------|
| Peak PDI Score        | 0.8500 (1.0 = fully synthetic, 0.0 = human) |
| Voice Classification  | SYNTHETIC                                   |
| Tremor Energy         | 0.1200                                      |
| Physiological Tremor  | NOT DETECTED                                |
| Peak Tremor Frequency | 10.0 Hz                                     |

## 3. Extracted Scam Identifiers

These identifiers were extracted from the call transcript and are suitable for inclusion in an FIR or complaint on the National Cyber Crime Portal.

| Identifier Type       | Values                       |
|-----------------------|------------------------------|
| UPI IDs               | user@upi, scammer@fakeupi    |
| Phone Numbers         | +919876543210, +911234567890 |
| Bank Accounts         | None detected                |
| IFSC Codes            | None detected                |
| URLs / Apps           | None detected                |
| Impersonated Entities | None detected                |
| Caller Claimed Names  | None detected                |

### 3b. Entity Verification (Investigative Signals)

IMPORTANT: The following are investigative signals for human judgment only, not automated fraud determinations. They provide useful leads for investigators and do not constitute legal evidence about any company or individual.

No entity verification data available for this call.

### 4. Real-Time Fact-Check Verdict History

| Timestamp            | Status   | Message                  |
|----------------------|----------|--------------------------|
| 2026-09-17T10:01:00Z | CRITICAL | Lottery scam detected    |
| 2026-09-17T10:02:00Z | CRITICAL | UPI PIN request detected |

### 5. Transcript Summary

Test transcript: The caller claimed the victim won a lottery of 25 lakh rupees and demanded immediate payment of 5000 rupees via UPI PIN. This matches typical lottery scam patterns with urgent payment demands.

## 6. AI Scambaiter Exchange Log

The following exchanges were conducted by the PhaseGuard AI scambaiter persona ('Ramesh Ji') to delay the scammer and gather additional evidence.

**Exchange 1** [2026-09-17T10:02:00Z]

**Scammer:**

**Scambaiter:**

**Exchange 2** [2026-09-17T10:03:00Z]

**Scammer:**

**Scambaiter:**

## 7. Escalation Chain of Custody

All escalation attempts are logged here for chain-of-custody purposes. No escalation was sent without explicit human confirmation.

| Drafted At | Confirmed At      | Destination       | Status |
|------------|-------------------|-------------------|--------|
|            | NOT YET CONFIRMED | cybercrime.gov.in |        |
